# Fee Explanatory Notes

---

## Community Membership

**Term:** 1 year (January–December)

**Membership Fee:** \$20

A Community Membership is an annual fee providing access to the ACS community hubs and general Society engagement for one calendar year.

---

## New Breeder (Full) Membership

**Term:** Financial year (July–June)

**Single Membership (1 breeding prefix):** \$250

**Joint Membership (1 breeding prefix, 2 members):** \$300

A New Breeder Membership (single or joint) includes registration of one breeding prefix per membership. Membership runs from the date of joining through to 30 June of the current financial year and is not based on a 12-month rolling period. Renewal is required from 1 July each year to maintain continuous membership.

---

## Renewing Breeder (Full) Membership

**Term:** Financial year (July–June)

**Single Membership (1 breeding prefix):** \$135

**Joint Membership (1 breeding prefix, 2 members):** \$185

Breeder Membership renewals fall due annually on 1 July, with a one-month grace period through July. If membership is not renewed by 1 August:

- Access to Society resources, including the member hub and registry database, will be removed.
  - Membership will be considered lapsed.
  - Rejoining after this date requires submission of a new membership application and payment of the applicable new membership fee.
- 

## Administration Fee — \$15

This fee applies where administrative work is required to amend registry records or reissue documentation. This includes:

- Transfer of ownership requiring a new certificate
- Corrections resulting from information submitted incorrectly (e.g. microchip details, colour, size or similar data)

This fee does not apply where corrections are required due to registry error.

---

### **Breeding Approved Upgrade — \$50**

This fee replaces the previous “Register a Dog” and reciprocal registration fees.

Dogs may now be entered into the database without an upfront registration charge. The upgrade fee becomes payable only when a dog is formally approved as breeding eligible.

This fee applies to:

- Dogs newly entered into the registry once breeding approval is granted
- Dogs already recorded in the registry, including those born within the ACS registry, when progressing to breeding-approved status

This structure supports early data capture while ensuring fees are applied at the appropriate stage of breeding approval.
